

### **Abstract of the Disclosure**

5       A computer reservation system matches vehicle  
ratings using a central database. Vehicle information  
and rental equipment information are stored in the  
central database. A user specifies a vehicle description  
including make, model, and year of the vehicle on a  
website. The central database is searched based on the  
vehicle description to find related vehicle information  
10       including physical characteristics of the vehicle. The  
rental equipment in the central database is identified  
which is compatible with the vehicle as determined by a  
comparison of the rental equipment information to the  
vehicle information. The physical characteristics of the  
15       vehicle are compared to physical characteristics of the  
rental equipment to determine compatibility between the  
vehicle and the rental equipment. The compatible rental  
equipment is displayed on the website for the user.
